

# ***GUARANTEED*** **Arthritis Protocol**

We have found a simple two-part protocol which is *guaranteed* to relieve the pain and stiffness of osteo- or rheumatoid arthritis.

## **#1 Joint-FX capsules: 2 capsules twice daily**

Joint-FX capsules include four herbs which decrease inflammation in the body:

**Feverfew:** inhibits the body's inflammatory hormones

**Boswellia Serratta** (frankincense): inhibits inflammatory hormones, aids in cartilage regeneration and improves blood supply to joint tissues.

**Bromelain:** inhibits inflammatory hormones, helps rid the body of scar tissue and dead and damaged tissue.

**White Willow Bark:** a small amount of 'natural aspirin' for pain and inflammation.

Joint-FX also includes **glucosamine and chondroitin**, which have been used together to regenerate cartilage and improve the 'shock-absorption' needed in our joints.

## **#2 PureOmegaPlus or 900: 3 capsules daily for one week; then 1-2 capsules per day.**

While the advent of 'low-fat' diets and foods has decreased the amount of fat in the standard American diet, we still consume too many Omega-6 fats: vegetable oils, trans fats and animal fats. Omega-6 fats can encourage the formation of inflammatory hormones such as thromboxanes and leukotrienes. While moderate amounts of Omega-6 fats are necessary, our bodies need more Omega-3 fats—which are anti-inflammatory—than most of us consume.

Omega-3 fats are found in cold-water fish, green leafy vegetables, seeds, nuts, olive oil and flax seed oil. If our bodies get sufficient quantities of Omega-3 fats, we produce our own anti-inflammatory hormones. The **Pure Omega Plus** capsules provide a pure, potent source of Omega-3 fats.
